Uses Covered by the Certified Applicator's Certification.**

SCOUT X-TRA™ INSECTICIDE

(EPA Reg. No. 34147-3-54382)

SLN No. ID-930010

For Distribution and Use Only Within the State of Idaho
under a Special Local Need Authorization Under FIFRA Section
24(c).

Emergency Calls: 908-231-4125

For a spill emergency, call Chemtrec at 1-800-424-9300.

IMPORTANT

Before using this product, read and carefully observe all
directions, restrictions, and precautionary statements on the
EPA-approved Scout X-TRA Insecticide label.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner
inconsistent with its labeling. This labeling must be in the
possession of the user at the time of application.

Crop	Pest	Fl.Oz./Acre
Seed Alfalfa	Lygus Bugs Pea Aphids Alfalfa Weevils	1.9 to 2.7

To control Lygus Bugs, Pea Aphids, and Alfalfa Weevils, apply Scout X-TRA Insecticide at a rate of 1.9 to 2.7 fluid ounces (0.013-0.019 lb. ai) per acre. For aerial application, use a minimum of 2 gallons of water per acre. For ground application, use a minimum of 10 gallons of water per acre for thorough coverage of the foliage.

Make aerial or ground applications when the wind velocity favors on-target product deposition (approximately 3 to 7 mph). DO NOT apply when wind velocity exceeds 7 mph.

DO NOT apply by ground within 25 feet or by air within 75 feet of lakes, reservoirs, rivers, permanent streams, marshes, or natural ponds, estuaries, and commercial fish farm ponds.

For aerial application, the spray boom must be mounted on the aircraft so as to minimize drift caused by wingtip or rotor vortices. Boom length must not exceed 75% of wing span or rotor diameter.

NOTES:

1. DO NOT apply more than 2.7 fluid ounces (0.019 lb. ai) per acre per treatment. DO NOT make more than 3 applications in a crop year.
2. DO NOT apply Scout X-TRA Insecticide or allow it to drift to blooming crops or weeds while bees are actively visiting the treatment area.
3. DO NOT cut current year's treated alfalfa seed crop for hay or forage.
4. DO NOT graze current year's treated alfalfa seed crop. Treated alfalfa seed is not to be used for sprouting.
5. All alfalfa seed treated with Scout X-TRA Insecticide is to be tagged at the conditioning plant "NOT FOR HUMAN OR ANIMAL CONSUMPTION". It shall be the grower's responsibility to notify the conditioning plant of any alfalfa seed crop treated with Scout X-TRA Insecticide.
6. Screenings and seed from seed conditioning are prohibited from feed channels. All Scout X-TRA Insecticide treated alfalfa seed screenings must be removed from the feed market.
7. DO NOT apply Scout X-TRA Insecticide through any type of irrigation system.
